

WPZ CONNECTOR

Sealed connectors/Board-to-wire

This is a multi-circuit sealed connector that achieves low profile and miniaturization.

Features

● Low insertion force, high contact reliability

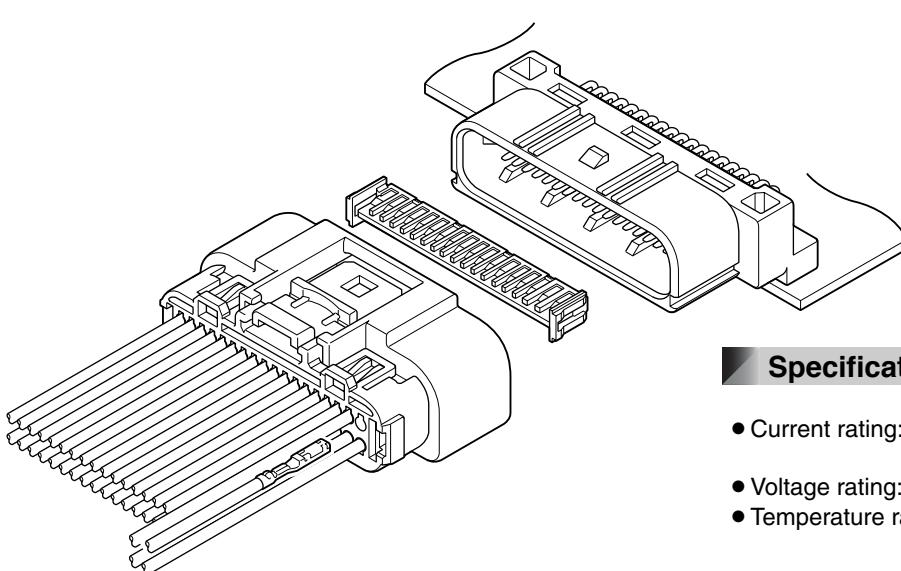

Gold plating is used for surface finish of contact part of a terminal so that low insertion force and high contact reliability are realized.

● Lock protection structure

This connector has the lock protection structure that prevents serious deformation of lock and pinching wires. When mating connector, or assembling wire harness with header, it prevents breakage of lock.

● Sealed

Mat seal is adopted for improving the workability of harness assembling.
